Finishing

Advantage of Lithium-ion Batteries

- **No Memory Effect**
- Compared to Ni-Cd Batteries
Batteries can be charged partially with no adverse effect on the battery
- **Eco-Friendly Chemistry**
No more heavy metal composition (vs. Ni-Cd)
- **Low Temperature Operable**
-20°C to +60°C
- **Low Self-Discharge Rate**
Up to 80% capacity remained after 6 months storage
